Why Belarus?

The high degree of unawareness among the majority of western countries about Belarus (middle-sized Eastern European country, counting about 10 million inhabitants) is probably hiding one of the best business environments in its region. Being the main frontier of the Eurasian Economic Community customs union with the European Union, business in Belarus is the access gate to a market with over 200 million potential consumers. Thanks to its integration with Russia and Kazakhstan, the goods crossing its customs can arrive to Central Asia and the Russian Far East without having to overcome any significant trade barriers.
